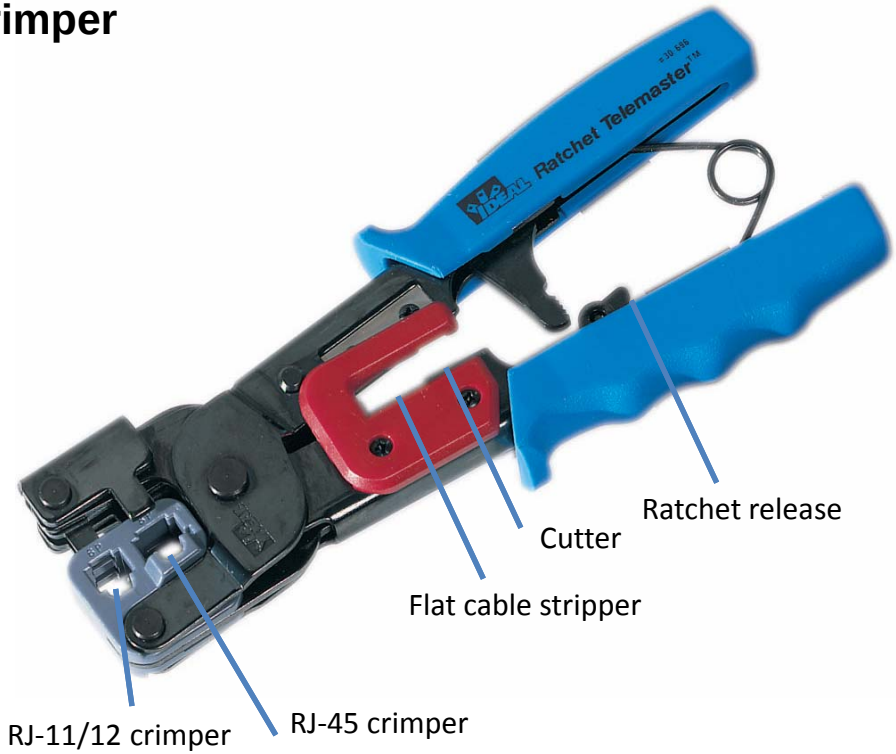
30-696 Ratchet Telemaster™ Modular Plug Crimper

Multi-purpose ratcheting modular plug crimping tool with built in cutter and jacket stripper designed to attach RJ-45 (8 position) and RJ-11/12 (6 position) connectors to CAT5e, CAT6 or voice grade cables.



- Ratchet mechanism ensures tool completes the crimp cycle before releasing the connector
- Crimps industry standard CAT5e/6 RJ-45 (8P8C) and RJ-11/12 (6P6C/6P4C) modular plugs
- Precision ground contact dies evenly crimp standard plugs to industry specifications
- Heavier duty version of the 30-496 Telemaster™ for high use applications
- Multi-function tool also cuts UTP/STP and strips flat cable jackets
- No calibration required
- Can crimp most standard Shielded CAT5e/6 modular plugs
- Black oxide coated steel frame inhibits rust
- Textured contoured handle grips for comfort
- Protective guard helps prevent finger and blade damage
- Replaceable cutting and stripping blades
- Spring loaded handles
