33-864 PRO Tone & Probe Kit

Locate, trace, and identify copper cables with the Amplifier Probe and Tone generator kit. Send a tone on any de-energized copper cables including electrical cables, speaker wires, alarm cables, coax and data cables.

- Tone and probe units in one single kit
- RJ-11/12 and F port interfaces
- 3 tone settings
- Adjustable volume on the probe
- Alligator clips for testing other de-energized cables
- Continuity testing and talk set power settings
- Carrying case included
- Both testers use 9V batteries – included
